

## **WE DO NOT ACCEPT INSURANCE FOR A REASON**

If a Medical Doctor takes insurance, the insurance company is the patient, and the patient is the recipient.

When an Insurance Company says you are healed and DONE, the patient is DONE- regardless of if the desired result has been achieved.

We work quickly and effectively to help you resolve your health issues in a timely manner.

Together we can choose the course of treatment that best suits your health, your desired approach, and we work together until you say we are done, and you have achieved your desired result; **NOT WHEN THE INSURANCE COMPANY DECIDES YOU ARE DONE.**

Insurance is very helpful for many things, but once you step out of the 15-minute consult, prescribed "APPROVED" choices, and duration of treatment; it may also stop serving your best interests.

**YOUR BEST HEALTH-** is our total concern.

As health partners, ***WE CAN ACHIEVE THIS TOGETHER.***
